User Manual

Prepared by: Ravel

1. Introduction

Welcome to the Ravel!

This manual provides comprehensive instructions for installing, configuring, and using the Ravel AI-powered music streaming and discovery platform. By following these guidelines, you will be able to discover talented underrepresented artists, enjoy personalized music recommendations via our AI assistant "Debussy", and effectively share your own music if you are an artist.

2. Setup Guidelines

2.1 System Requirements

- Operating System: Windows, macOS, or Linux
- Browser: Chrome, Firefox, Safari, or Edge (latest versions)
- RAM: 2 GB minimum
- Storage: At least 500 MB free disk space for database and uploads
- Software: Python 3.8 or higher
- Internet: Required for AI recommendations and DashScope API connectivity

2.2 Installation

- Download Python 3.8+ from the official Python website and install it on your system.
- Extract the Ravel project files to your desired directory. Open a terminal in the project directory (cd group9-ravel-appdevproject).
- Install the required Python packages by running: `pip install Flask python-dotenv werkzeug openai`
- Initialize the database by running `python setup_db.py`. Verify that the terminal confirms the database and tables were created.
- Launch the application server by running `python app.py`.
- Open your web browser and navigate to <http://localhost:5000>
- Can also be accessed through a browser (Link: https://melodymelon23.pythonanywhere.com/login?fbclid=IwY2xjawQk3M5leHRuA2FibQIxMQBzcnRjBmFwcF9pZAEwAAEenRmI2XLl1L-oJoMzAAGRJ-DNFL-JajW9PYI6_tugJe2wPBYqYnwVgEv67Ys_aem_TJBoDXI63wvVd--6qgTNhA))

3. Getting Started

3.1 Creating Your Account

Create a user account.

Step 1: Go to the Ravel Login page and click Sign Up.

The image shows a login and sign-up form for the Ravel application. At the top is the Ravel logo, which consists of a blue circle with a white musical note and the word "Ravel" in white. Below the logo are two input fields: one for "Email" and one for "Password". Below these fields is a blue "Login" button. Under the "Login" button, there is a line of small text: "By logging in, you agree to our [Terms of Service](#) and [Privacy Policy](#)". At the bottom of the form, there is a link that says "Don't have an account? [Sign Up](#)". The "Sign Up" link is highlighted with a red rectangular box.

Figure 3.4 Account Creation

3.2 User Roles

Role	Permissions
Admin/Artist	Upload original MP3 tracks to the platform, provide track metadata for AI recommendations, access the Musician Dashboard to view track analytics, and benefit from algorithms that boost visibility for

	underrepresented artists.
User/Listener	Access the personalized Dashboard for AI recommendations, search for tracks and artists, chat with the AI assistant (Debussy) for mood-based discovery, create and manage custom playlists, and view personal listening statistics.

3.3 Main Interface Overview

3.3.1 Listener Interface Overview

- Left Sidebar (Navigation): Provides quick access to your core spaces—Dashboard, Search, AI Chat, Library, and Profile.
- Top Bar: Houses your user account menu and the logout option.
- Content Area: The central workspace that dynamically changes based on your navigation. It displays your saved playlists, AI recommendations, search results, or profile statistics.

3.3.2 Admin / Artist Interface Overview

- Left Sidebar (Navigation): Provides quick access to your core spaces—Dashboard, Search, AI Chat, Library, and Profile.
- Top Bar: Houses your user account menu and the logout option.
- Content Area: The central workspace that dynamically changes based on your navigation. It displays your saved playlists, AI recommendations, search results, or profile statistics.

4. Operational Procedures: Listeners

4.1 Using the Dashboard

4.1.1 Dashboard serves as your personalized music hub.

Step 1: View **Saved Playlists** for quick access to your created collections.

Step 2: Review **AI Recommendations** generated by Debussy based on your listening history.

Step 3: Check your **Top Genres** and **Quick Stats** to see your listening trends.

Figure 4.1 Restoration of Session Navigation

4.1.2 Search and Discovery

Step 1: Click Search in the Navigation menu

Step 2: Type your query (song title, artist name, or genre) into the search bar and press Enter.

Step 3: Browse the results. Click on any artist's name to view their complete discography and check if they are an underrepresented artist.

4.1.3 AI Chatbot Discovery (Debussy)

Debussy provides personalized music recommendations through natural conversation.

Step 1: Click AI Chat in the navigation menu.

Step 2: Type a prompt based on your mood or preferences (e.g., "I'm feeling melancholic today" or "Create a workout playlist").

Step 3: Review Debussy's suggestions. The system will prioritize underrepresented artists and can automatically generate saved playlists based on your requests.

4.1.4 Managing the Library (Playlist)

Step 1: Click Library in the navigation menu to view your playlists. (An auto-generated "Liked Songs" playlist will track all songs you've played).

Step 2: Click **New Playlist**, enter a name, and click Create.

Step 3: To add songs, search for a track, click Add to Playlist, and select your target playlist.

Step 4: To play music, open a playlist and click the Play button next to a song. The music player will appear at the bottom of the screen.

4.1.5 Viewing Profile Statistics

Step 1: Click Profile in the navigation menu.

Step 2: Review your top 3 most-listened genres, total stream count, and complete listening history.

5. Operational Procedures: Artist/Musicians

5.1 Uploading Tracks

Step 1: Click Upload in the navigation menu.

Step 2: Fill in the track details: Track Title, Artist Name (pre-filled), and Genre.

Step 3: Click Choose File and select your MP3 file (Maximum 20 MB).

5.2 Musicians Dashboard Analytics

Step 1: Log in to your Musician account and navigate to the Dashboard.

Step 2: Review your performance metrics, including Total Streams, Unique Listeners, Track Analytics, and your Top 5 Tracks.

Step 3: Check your Underrepresentation Status to see how the platform categorizes your visibility.

6. Features Overview

The following table outlines the core feature availability per user type:

Feature	Listeners	Musicians	Description
Search	Yes	Yes	Find music and artists

Streaming	Yes	No	Play tracks and log history
Playlist	Yes	No	Organize music collections
AI Chat	Yes	No	Mood-based AI discovery
Upload	No	Yes	Share MP3 files to the platform
Analytics	Profile Statistics	Dashboard	Monitor listening or track activity

7. Troubleshooting

The following table covers common issues and solutions:

Problem	Possible Cause	Solution
Cannot Access App	Server not running	Run <code>python app.py</code> in terminal. Check port 5000.
Cannot Login	Wrong credentials	Verify email/password. Ensure database is initialized.
Database Errors	Missing files/tables	Run <code>python setup_db.py</code> to reset the database.
File Upload Fails	Wrong format/size	Ensure file is exactly .mp3 format and under 20MB.
AI Chat Error	Invalid API Key	Check <code>.env</code> file for valid <code>DASHSCOPE_API_KEY</code> .
Music Won't Play	Browser restriction	Check system volume; ensure browser allows audio playback.

8. Frequently Asked Questions (FAQ)

Q: Is Ravel free to use? A: Yes! Ravel is completely free for both listeners and musicians. There are no premium subscription tiers at this time.

Q: Do I need an account to use Ravel? A: Yes, you must create an account and log in as either a Listener or a Musician to access the platform's features.

Q: Can I change my account type after creating it? A: Currently, you cannot switch your account from Listener to Musician or vice versa. If you wish to change roles, please register a new account with a different email address.

Q: Is my listening activity private? A: Yes. Your listening history and saved playlists are private and only visible to you on your profile page and library.

Q: How often does Debussy (the AI) update its recommendations? A: Debussy learns from your recent listening activity and updates its recommendations in real-time as you interact with the platform.

Q: Can I share my customized playlists with other users? A: The current version of Ravel does not support public playlist sharing. This feature is planned for future updates.

Q: Why do some artists have an "underrepresented" status? A: These are talented emerging artists with fewer total streams. Ravel's core mission is to democratize music discovery, so our algorithm actively prioritizes recommending these artists to help them build an audience.

Q: Can I download songs for offline listening? A: No, offline listening is not supported at this time. All songs must be streamed online through the web application.

Q: How do I report a broken song file or inappropriate content? A: The current version does not feature an automated reporting button. Please contact the project administrators directly with the track title and artist name.

Q: How long does it take for my uploaded song to appear in recommendations? A: Your track is available on the platform immediately after a successful upload and instantly becomes eligible for Debussy's AI recommendations.

Q: Can I edit song information (metadata) after uploading? A: The current version does not support editing track details after submission. If you made a mistake, you will need to contact support to remove the track and then re-upload it with the correct information.

Q: Can I delete my uploaded songs from the platform? A: There is currently no manual delete button on the Musician Dashboard. Please contact support to have a track permanently removed.

Q: How exactly are "streams" counted? A: A stream is counted the moment a user clicks "Play" on your track, regardless of how long they listen to the song.

Q: Will Ravel pay me for streams? A: Ravel is currently a non-monetized, academic/developmental project. There is no revenue sharing or royalty payout system in this version.

Q: What happens if the database gets corrupted? A: You can reset the system by deleting the `ravel_database.db` file in your project folder and running `python setup_db.py` in your terminal. Note: This will erase custom uploads and accounts, replacing them with the default sample data.

Q: Is my data backed up automatically? A: Data is stored locally in your SQLite database. There are no automatic cloud backups. If you are hosting this, you should manually copy and back up the `ravel_database.db` file regularly.

Q: I am getting a "ModuleNotFoundError" when trying to run the app. What do I do? A: This means your environment is missing required packages. Open your terminal and run: `pip install Flask python-dotenv werkzeug openai`

9. Support and Contact Information

If you encounter issues not covered in this manual, please check your browser console (F12) for error messages and contact the project administrators.
